DST

EXCELLENCE THROUGH TEAMWORK

About Data Systems & Technology, Inc.

Data Systems & Technology, Inc. (DST) provides proven and cost-effective IT solutions to government and commercial clients. We specialize in systems engineering and technical assistance (SETA), testing and evaluation, and network services. In so doing, DST provides uniquely creative solutions to help clients carryout out mission-critical functions and responsibilities.

Established in 1990, DST is a diverse organization comprised of customer-focused team members who exhibit personal integrity and adhere to high performance standards. These individuals represent over 100 years of combined professional and technical experience.

DST is uniquely positioned to meet the critical needs of government, and government contracting agencies, as the corporation holds the following certifications:

- Veteran-Owned
- Small Disadvantaged Business
- SBA Hub Zone; and
- SBA 8(a) Program Graduate.

DST's Commitment to Excellence

The leadership and staff at DST are dedicated to the delivery of quality scientific and technical products and services that contribute to the security and well being of our nation and the free world.

We believe high ethical standards are essential to achievement of our individual and corporate goals. As such, we fully subscribe to the following commitments:

- We shall place the highest priority on quality, timeliness, and the competitiveness of our products and services.
- We shall pursue our objectives with a commitment to personal integrity and high professional standards.
- We shall be responsible corporate citizens, respecting the laws and customs of each community in which we conduct business.
- We shall conduct ourselves so as to enhance and preserve the reputation of the company.
- Consistent with the commitments expressed above, we shall strive to provide our shareholders a fair return on investment.

Our Services

Test & Evaluation

DST performs a wide range of engineering, technical and support services that encompass planning, conducting, evaluating, and the reporting of C4I systems testing, including operational testing, standards compliance and interoperability testing.

We have specialized expertise in the technical and operational characteristics of select joint and combined C4I tactical and strategic systems. Additionally, we support the analysis of, and/or testing and evaluation of, joint and combined architectures and standards.

Our specialization covers, but is not limited to, the following areas:

- C4I Standard Compliance Testing
- Developmental and Operational Testing
- Interoperability Testing
- Independent Verification and Validation
- Net-Centric Tools Development
- Agile Testing Methodology
- GEOINT

Program Management

DST provides a broad range of program management services – from resource planning and reporting to preparing technical proposals. We plan, coordinate, execute, and report on a variety of test and evaluation efforts. We also conduct research and develop proposals to develop new and upgraded test facilities.

Infrastructure & Process Modernization

DST technical staff possesses a broad range of capabilities within Infrastructure and Process Modernization. We leverage proven methodologies and tools, such as Agile testing and development methodologies to streamline business processes and provide enhanced customer service.

Our services in this area includes:

- Help Desk Support
- LAN Operations
- Application Support
- Portal/Knowledge Support
- Configuration Management

Cyber Security/Information Assurance

DST helps its clients identify and mitigate risk, prior to implementation in a production environment. In doing so, we provide cyber security and information assurance services which include information assurance assessments, vulnerability assessments and analyses, and information assurance planning.

Our capabilities in the field of cyber security, include:

- Risk/Vulnerability and Assessment Mitigation
- Network Security
- Access Control
- Security Practices/Policies

Master & Strategic Planning

DST works closely with government and commercial agencies to develop master and strategic plans that move their organization forward and assist in the achievement of organizational goals.

In so doing, we provide the following services

- Strategic Objectives and Organizational Analysis
- Operational Goal Management
- Scorecard/Performance Monitoring
- Digital Dashboard Performance Measurement Tools

Intelligence, Surveillance, & Reconnaissance (ISR)

DST provides the latest Department of Defense (DoD) Net-Centric solutions in all areas of ISR collection, processing, exploitation, and dissemination systems. This includes:

- Systems Integration
- Concept & Requirements Development
- Architectures Development
- Legacy Interfaces and Migration
- Intelligence Analysis
- GEOINT

Our Strategic Partners

To develop integrated technology solutions with enhanced value, DST maintains strategic alliances and partnerships with some of the nation's most recognized and reputable corporations. Our corporate partners develop technology that broadens our capabilities and enhances the scope, versatility and power of our IT solutions.

The following are some of the corporations with which we team and partner.

- TASC
- Northrop Grumman
- Unisys
- SAIC
- ARISTON
- Optimum Output
- Culturati Research & Consulting
- NCI, Inc.
- Booz Allen Hamilton
- Quasars, Inc.
